15. That all the works necessary for constructing and laying down the several railway tracks shall be made in a substantial manner and according to the best modern practice, and under the supervision of the City Surveyor, or such other officer as the Council shall appoint for that purpose.

16. If horses are used, the roadway between and within at least eighteen inches from and outside of each rail shall be paved or macadamized and kept constantly in repair by the said parties of the second part, who shall also be bound to construct and keep in good repair crossings of a similar nature to those at present or that may be adopted by the Corporation over the streets traversed by the said railway, at the intersection of every such railway track and crossings, whether at cross-streets or otherwise.

17. The tracks shall conform to the grade of the said streets on which they are laid down, as furnished by the City Surveyor, or other officer as aforesaid, and shall not in any way change or alter the same.

18. The location of the line of street railway in any of the streets shall not be made until the plans thereof, showing the position of the rails and other works in each street, shall have been submitted to and approved of by the City Surveyor or such other officer as aforesaid.

19. The City authorities shall have the right to take up the streets traversed by the rails, either for the purpose of altering the grades thereof, constructing or repairing drains, or for laying down, removing, or repairing water or gas pipes, or electrical conduits of any kind, and for all other purposes within the province and privileges of the Corporation, without being liable for any compensation or damage that may be occasioned to the working of the railway or to the works herein contemplated; but the said City authorities shall nevertheless replace and put in as good order and condition as before such removal and displacement any and all of the tracks, poles, wires, or works belonging to the parties of the second part which said authorities may at any time remove or displace; and if not so replaced and put in good order and condition by the said City authorities within a reasonable time, with due regard to the completion of the work that may be in hand by the Corporation, the parties of the second part may cause the same to be done at the expense of such authorities.

20. The rail to be employed by the said railway shall be the flat rail, such as is now generally used for the present system of electrical or horse-car railways.

21. Each car employed on said railway shall be numbered.

22. The cars shall run over the whole of the streets mentioned in the Schedule hereto on which the said tracks are laid, at least 15 hours in summer and 15 hours in winter, on each day, and at intervals of not more than 30 minutes.

23. The speed of the cars shall never exceed ten miles an hour.

24. The conductor or other person in charge of each car shall announce to the passengers the names of the streets as the cars reach them.

25. The cars shall be used exclusively for the carriage of passengers.

26. The parties of the second part shall be liable for all damages arising out of the construction or operation of the works herein contemplated.

27. If the said parties of the second part neglect to keep the tracks or roadway between the same, or crossings between and on each side of the rails in good condition, or to have the necessary repairs made therein as aforesaid, the City Surveyor or other proper officer shall give notice thereof requiring such repairs to be made forthwith, and if not made within a reasonable time the said City Surveyor or other officer as aforesaid may cause the same repairs to be made, and the amount as expended by the Corporation may be recoverable against the said parties of the second part in any Court of competent jurisdiction.

28. That before breaking up, opening, or interfering with any of the said streets for the purpose of constructing the said railway, the said parties of the second part will give, or cause to be given, to the said Corporation at least 30 days' notice of their intention, and that no more than 2,500 feet of the said streets shall be broken up or opened at any one time, and that when the work thereon shall have been commenced the same shall be proceeded with steadily and without intermission, and as rapidly as the same can be carried on, due regard being had to the proper and efficient construction of the same.

29. That during the construction of the said railways due and proper care shall be taken to leave sufficient space and crossings so that the traffic and travel on the said streets and other streets intersecting same shall not be unnecessarily impeded, and lights burning or watchman provided and kept by the said parties of the second part, when and where required, to prevent accidents to the public.

30. That the tracks of said street railway or railways shall not exceed five feet in width, and shall be flush with the street, so as to offer as little obstruction as possible to vehicles crossing the same, and that it shall and may be lawful to and for all and every person and persons whomsoever to travel upon and use the said tracks with their vehicles, loaded or empty, when and so often as they may please, provided they do not impede or interfere with the cars of the said parties of the second part running thereon, and subject at all times to the right of the said parties of the second part (their executors, administrators, and assigns) to keep the said tracks with the said cars when meeting or overtaking any other vehicle thereon.

31. That the said parties of the second part shall and will at all times employ sober, careful, and civil agents, conductors, or drivers, to take charge of the cars upon the said railways, and that the said parties of the second part, and their agents, conductors, and drivers, shall and will from time to time, and at all times during the continuance of this franchise and the exercise of the rights and privileges hereby conferred, operate the said railways and cause the same to be worked under such regulations as the Council of the City of Victoria may deem necessary and requisite for the protection of the persons and property of the public, and provided such regulations shall not infringe on the privileges granted to the said parties of the second part hereby.

32. That wires along which the trolleys run shall be at a distance of not less than eighteen feet above the street.

33. That the parties of the second part, in addition to the powers hereinbefore expressed, may lay, construct, and operate a single line of street railway over and along any bridge in the said City, the tracks of such railway on any bridge to be flush with the flooring of the same; provided, however, that the said parties of the second part shall furnish and lay, at their own expense, a new flooring over the whole of any bridge so crossed; and provided also, that the location of any such bridge line, and the work done therein, and the material provided therefor, shall be to the satisfaction of the City Surveyor or such other officer as aforesaid.

34. That the poles used for supporting the electrical conduits shall not be inferior in appearance to those, on the day of the date hereof, used in Government Street, in the City of Victoria, by the Telephone Company.

In witness whereof the parties of the second part have hereto set their hands and seals, and the Corporation has caused the corporate seal of the City of Victoria to be hereto affixed.
