

Intent Statements

The intent statements, as well the objectives and functional statements for each code requirement in the model National Building, Plumbing and Fire codes are available at <http://codes-guides.nrc.ca/IA/15NBC/intentframe.html> .

Code users should note that, due to some variations in requirements between the model national codes and the BC codes, not all intent statements, objectives and functional statements listed are relevant to all BC code requirements. The objectives and functional statements attributed to the requirements of the BC codes are listed in the Code.

Intent statements are not part of the BC codes regulations.
